DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim(s) 18 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claimed invention "a computer-readable storage medium" does not fall within at least one of the four categories of patent eligible subject matter recited in 35 U.S.C. 101 (process, machine, manufacture, or composition of matter).

The claimed invention is directed to a judicial exception to 35 U.S.C. 101 (i.e., an abstract idea, natural phenomenon, or law of nature) and is not directed to a practical application of such judicial exception (e.g., because the claim does not require any physical transformation and the invention as claimed does not produce a useful, concrete, and tangible result).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. **Claim(s) 16-18** are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for "storing a first backup copy of telephone directory information received from a first subscriber having a first telephone number, as well as a second backup copy of telephone directory information received from a second subscriber having a second telephone number, does not reasonably provide enablement for responsive to a telephone number change notification instruction requesting a change of the first telephone number to a third telephone number, searching the first backup copy to find that the second telephone number is registered therein and responsive to detection of the second telephone number in the first backup copy, searching the second backup copy to determine whether the first telephone number is registered therein. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to understand the invention commensurate in scope with these claims.

The first telephone number is stored in a first backup copy and a second telephone number stored in a second backup copy. Further down the claim limitations recite the searching the second backup copy to for the first telephone number, which was registered at the first backup copy earlier.

Claim(s) 3, 4 and 7-10 are rejected for being dependent of rejected claims.

Response to Arguments

4. Applicant's arguments with respect to **claim(s) 3, 4, 7-10, 16, 17 and 18** have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gerald Gauthier whose telephone number is (571) 272-7539. The examiner can normally be reached on 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fan Tsang can be reached on (571) 272-7547. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
